HAND TOOLS

Good things that make
people feel good

Mankind invented tools to serve him. Those tools helped him to develop civilization. A tool that fits the hand – a tool that evokes the inner mind – is the means for maximizing one's ability. Today, both around the home and in the industrial world, the demand has arisen for a new form of tool that "fits the hand". "Tools that make anyone a pro" ... Backed by over 80 years of technical prowess, Vessel is developing ergonomic products in a search of the best tool for the human hand. Vessel wants to convey "professional grit" to users.
